Green Turtle Launches the PHIX Pac System: Easy-to-Use Media Packets for Acid Neutralization

March 20, 2008. Today Green Turtle announced the launch of its PHIX Pac system, an acid pH neutralization system using permeable packets containing Green Turtle's environmentally-friendly PHIX Media.

PHIX Media has been shown to outperform limestone by a factor of 5 to 1. Just 20 pounds of PHIX Media can achieve the same results as 100 pounds of limestone.

Ideal for new construction or retrofit projects, PHIX Pacs have a broad range of applications including schools, hospitals, laboratories, maintenance sinks and numerous industrial applications.

The PHIX Pac system is available in 5 lb packages, which are placed into neutralization tanks and can be easily removed and replaced. Installation is simple and maintenance is minimal. PHIX Pacs are retrieved and replaced quickly and efficiently.

About Green Turtle

Green Turtle works with commercial, industrial and institutional customers to deliver innovative wastewater pretreatment solutions that meet local effluent requirements. Green Turtle provides systems that are flexible and easy to install and maintain, with industry-leading warranties.
