

Smartpro™

Automated Sensors & Monitoring Systems

To compliment Green Turtle's strong product offerings, innovative instrumentation and automation accessories were created in an effort to minimize operational risk and ensure compliance. The result is **Smartpro™**, a complete line of monitoring systems - now available in wireless form.

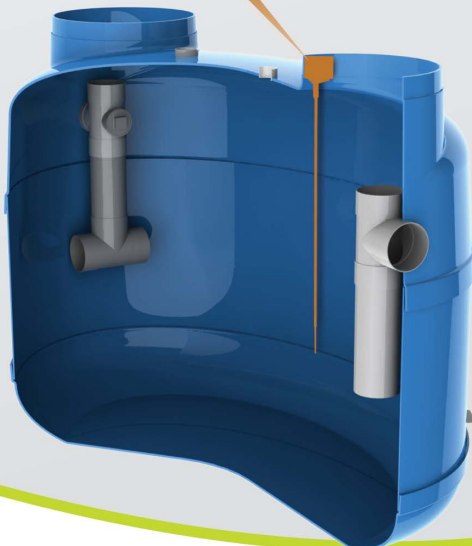

Though the accessories and options are a great stand-alone retrofit in nearly any third-party vessel, they are most suited for use in the Proceptor™ family of products by Green Turtle.

Benefits

- Wireless Technology for effortless grease management with **no monthly monitoring fees**
- Monitor grease and oil level, sludge level, and even temperature with the push of a button
- Eliminate back-braking task of lifting cast iron covers to see inside the tank
- Alarm signals when it is time to pump
- Retrofit to most all interceptor systems & partner with pumpers to reduce pumping costs
- Total peace of mind regulatory compliance

Probe can be integrated with **Proceptor™** by Green Turtle or retrofit into existing grease interceptors and wirelessly connects to nearby monitoring panel

Features

- Simple Installation
- Grease Level Indicator
- Solids Level Indicator
- Total Liquid Level Indicator
- Temperature
- Visual Alarm
- Fully Digital Display

Grease-Oil  Wired

Liquid Interface Monitor

A visual and audible alarm alerts the operator when the oil or grease collection system's liquid level interface has reached a pre-set capacity level and the system needs to be pumped out.

Liquid Level Monitor

A visual and audible alarm alerts the operator that the fluid has reached a pre-determined level and the system needs to be pumped out or maintained.

Interstitial Monitoring for Double-Walled Tanks

A visual and audible alarm alerts the operator that liquid has been detected between the two walls of a double wall tank so that corrective measures can be taken.

pH Monitoring

From pH level readings to visual and audible alarms and data recording, select the features to meet your needs.

pH  Wired
